
EVENT CONCEPT NOTE

AI CONCLAVE 2026

Panel Discussions, Industry Workshops and Student Hackathon

Education | Agriculture | Healthcare

15-16 SEP 2026

Two-day programme

THREE SECTORS

Education, Agriculture and Healthcare

AJCE

Koovappally, Kanjirappally

AMAL JYOTHI COLLEGE OF ENGINEERING (AUTONOMOUS)

Koovappally, Kanjirappally, Kottayam District

PROGRAMME OVERVIEW

About the Event

AI Conclave 2026 is a two-day academic, industry and innovation programme focused on the practical use and future potential of Artificial Intelligence in Education, Agriculture and Healthcare.

The programme brings together domain experts, industry professionals, educators, researchers and students through three connected formats: expert panel discussions, hands-on industry workshops and an open student hackathon.

AT A GLANCE

Day 1 combines morning panel discussions with afternoon industry workshops. Day 2 is a five-hour student hackathon followed by external evaluation and a closing ceremony.

Purpose

- Create a common platform for academia, industry and students to examine the role of AI in priority sectors.
- Expose participants to current industry practice through focused technical workshops.
- Encourage school and college students to develop practical, socially relevant solutions.
- Support both technical and non-technical approaches to innovation.
- Build opportunities for future mentorship, research and institutional collaboration.

Programme Structure

DATE	PROGRAMME
15 September	Day 1 - Panel Discussions and Industry Workshops
16 September	Day 2 - Student Hackathon, Evaluation and Closing Ceremony

Participation

The panel discussions are intended for experts, professionals, educators, researchers and students. The workshops and hackathon will also be open to eligible students from external institutions.

DAY 1 | MORNING SESSION

AI Panel Discussions

The morning session will examine the opportunities, challenges and responsible adoption of AI in Education, Agriculture and Healthcare.

Schedule

TIME	PROGRAMME
9:00 AM	Participant registration and reception
9:30 AM	Inaugural ceremony by Shri Dean Kuriakose
10:00 AM	Commencement of panel discussions
12:30 PM	Conclusion of panel discussions and lunch break

Education and Academic Panel

The session will cover AI-assisted learning, educational accessibility, digital transformation, intelligent learning systems, research innovation and the future of teaching and academic administration.

- 01 **Dr. M. V. Rajesh**
Director, IHRD
- 02 **Dr. Shailesh S.**
Principal AI Architect, Laennec AI India Pvt. Ltd.
- 03 **Dr. Ajith Kumar R.**
Director, Centre for Digital Innovation and Product Development
- 04 **Dr. Sunil T. T.**
Director, ICFOSS

PANEL DISCUSSION THEMES

Domain Panels

Agriculture Panel

The session will focus on precision farming, crop monitoring, agricultural planning, automation, sustainability and technology-enabled rural development.

- 01 Mr. Alexy Binu**
CEO, AetherSphere
 - 02 Dr. Berin Pathrose**
Director of Planning, Kerala Agricultural University
 - 03 Dr. Leena Mary**
Professor, IIIT Kottayam; Former Principal, Government Engineering College, Kozhikode
-

Healthcare Panel

The session will address AI-supported diagnosis, medical innovation, patient care, healthcare accessibility, clinical decision-making and technology-driven social impact.

- 01 Mr. Viviek V. George**
CEO, Trivia Innovations
- 02 Dr. Thomas Paul**
Chief Orthodontist and Cosmetic Dental Surgeon
- 03 Mr. Robin Tomy**
Technology Innovator and Social Innovation Leader, TCS and K-DISC

Expected Outcomes

- Expert perspectives on emerging AI applications in the three sectors.
- A clearer understanding of implementation challenges and opportunities.
- Stronger interaction among academia, industry, government and student communities.
- Directions for future research, training and institutional collaboration.

FOR CONFIRMATION

Speaker participation and session moderators should be confirmed before public release.

DAY 1 | AFTERNOON SESSION

Industry and Technology Workshops

The afternoon session will offer practical exposure to contemporary technologies through workshops delivered with the participation of industry organisations and technical groups.

Schedule

TIME	PROGRAMME
1:30 PM	Workshop participant registration
2:00 PM	Commencement of workshops
4:40 PM	Conclusion of workshops

Proposed Contributors

- UST
- Tata Consultancy Services (TCS)
- Cloud Innovation
- Nexa Lab, AJCE - Robotics Workshop
- Other invited industry and technology partners

Indicative workshop areas include Artificial Intelligence, cloud technologies, software development, automation, robotics and emerging industry practices.

Participation

Workshops will be open to AJCE students and students from external institutions. School-student participation may be permitted where the topic and delivery format are appropriate.

A separate workshop registration will allow participants to select a session. Capacity and eligibility may vary according to the requirements of the organisation conducting each workshop.

EXPECTED OUTCOME

Participants will gain practical exposure to current tools and technologies, interact directly with industry professionals and explore project, career and collaboration opportunities.

DAY 2 | STUDENT INNOVATION

Open Student Hackathon

Day 2 will feature an open student hackathon centred on practical solutions for Education, Agriculture and Healthcare. External participants from schools, colleges and other eligible institutions may take part.

Schedule

TIME	PROGRAMME
8:30 AM	Team registration, verification and check-in
9:30 AM	Official commencement of the hackathon
9:30 AM-2:30 PM	Five-hour hackathon session
2:30 PM	Final submission deadline
2:30 PM-4:30 PM	Project demonstration and external evaluation
5:00 PM	Closing ceremony and result announcement

Participation Categories

CATEGORY 01

School Students

Open to eligible teams from schools, including external institutions.

CATEGORY 02

College Students

Open to eligible teams from colleges, including external institutions.

Teams will consist of a minimum of two and a maximum of four students. Each team will nominate one member as captain.

Sector Tracks

Education

Teaching, learning, accessibility, assessment, academic administration and student support.

Agriculture

Farming, crop management, sustainability, automation, supply chains and farmer support.

Healthcare

Patient care, diagnosis, accessibility, public health, hospital operations and medical awareness.

HACKATHON FORMAT

Entry, Preparation and Evaluation

OPEN-ENTRY FORMAT

There will be no preliminary idea-selection or shortlisting process. All eligible teams that complete registration within the available capacity and comply with the participation rules may enter directly.

Nature of Solutions

- **Technical solutions:** software applications, AI models, hardware prototypes, robotics systems, digital platforms or other functional technologies.
- **Non-technical solutions:** strategic frameworks, process innovations, policy concepts, service models, awareness systems or other well-researched and feasible proposals.

Innovation is not limited to coding. Any practical and meaningful solution relevant to the selected sector may be presented.

Project Preparation

Participants can also develop or prepare their projects from home before attending the hackathon. During the five-hour on-campus session, teams may present, demonstrate, refine or extend their work.

Each team should clearly explain the problem being addressed, the work completed before the event, the work completed or improved during the event, the originality of the team's contribution and the practical value of the proposed solution.

Evaluation

External evaluators with relevant academic, technical or industry expertise will assess the projects. School and college teams will be evaluated separately.

SUGGESTED CRITERION	WEIGHT
Problem relevance	20%
Innovation and originality	20%
Quality and effectiveness of the solution	20%
Practical feasibility and scalability	15%
Social or sectoral impact	15%
Presentation, demonstration and teamwork	10%

Technical entries may also be assessed for functionality and implementation quality. Non-technical entries may also be assessed for research quality, strategic clarity and implementation planning.

PROGRAMME COMPLETION

Evaluation Process and Expected Outcomes

Evaluation Process

1. Teams complete their final submission by 2:30 PM.
2. Each team presents or demonstrates its solution before the evaluators.
3. Evaluators interact with the team and record scores using a common evaluation sheet.
4. Results are consolidated separately for school and college categories.
5. The evaluation committee approves the final results.
6. Winners are announced during the closing ceremony at 5:00 PM.

Expected Event Outcomes

- Greater awareness of responsible and practical AI adoption.
- Stronger engagement among academia, industry, government and students.
- Hands-on exposure to industry technologies and methods.
- Student-led ideas and prototypes in Education, Agriculture and Healthcare.
- Opportunities for mentorship, project development and future collaboration.

Points for Final Confirmation

Before public release, the organising committee should confirm:

- | | |
|-----------------------------------|----------------------------|
| • Final panellists and moderators | • Evaluation panels |
| • Workshop topics and capacity | • Prize categories |
| • Hackathon registration deadline | • Technical facilities |
| • Maximum number of teams | • Certificate rules |
| • Presentation format | • Official contact details |

FACULTY REVIEW

This concept note is intended to establish a common understanding of the programme structure. Operational details can be incorporated once the respective committees and participating organisations provide final confirmation.
